Coursework and Certifications

- Portfolio Website (2023):
- Tech Stack: HTML, CSS, JavaScript
- Responsive design and interactive elements • View Project

- LMS (Library Management System) (2024):
- Tech Stack: React, Node.js, MongoDB
- Features: User authentication, Book search, and admin dashboard
- optimized for performance • View Project

- Doctors Website (2024):
- Tech Stack: React, Node.js, MongoDB
- Features: User authentication, Doctor search, and doctor Appointment • View Project at:

Technical skills

Programming Languages and Frameworks:

C , Java , Python , DSA , Next js
React Js, Database(SQL) , HTML , CSS , JAVASCRIPT

Area of Interests

**DSA and Algorithm , Object Oriented Programming(OOPs) ,
Web Development**

Soft skills

Communication

Communicate effectively with team members, stakeholders, and clients. Clear and concise communication ensures that everyone understands project requirements, progress, and potential issues.

Problem-Solving

Ability to analyze complex problems, break them down into manageable components, and develop effective solutions.

Teamwork and Collaboration

Being a team player, working well with others, and being open to feedback are essential skills for creating successful software products.

Time Management

Effective time management helps software engineers prioritize tasks, meet deadlines, and maintain a healthy work-life balance.

Adaptability

Being open to learning new technologies and methodologies is essential for staying relevant in the field.
