Hiring Manager
Goldman Sachs,
Bengaluru / Hyderabad

Respected Hiring Manager,

I am writing to express my interest in the 2025 Goldman Sachs Engineering Campus Hiring Program. Currently, I am a third-year B.Tech student in Computer Science and Engineering at Techno India University, and I am eager to bring my technical skills and passion for innovation to your esteemed organization.

Throughout my internships at FUSION TECH and ENCRYPTIX, I have developed expertise in full-stack and MERN stack development. I have successfully built and deployed secure, scalable web applications and collaborated with cross-functional teams to deliver real-world solutions. These experiences have strengthened my proficiency in JavaScript, React, Node.js, and MongoDB, as well as my ability to solve complex technical challenges efficiently.

Goldman Sachs' commitment to driving technological innovation in the financial industry greatly resonates with me. I am excited about the prospect of contributing to your cutting-edge engineering teams, where I can apply my skills in software development and problem-solving to tackle high-impact challenges. The opportunity to grow and learn within such a dynamic environment aligns perfectly with my career aspirations in software engineering.

Thank you for considering my application. I look forward to the opportunity to discuss how my technical skills and experiences align with the goals of Goldman Sachs. I am enthusiastic about the chance to contribute to your team and learn from industry leaders at the forefront of financial technology.

Yours Sincerely,
Soham Ghosh
